PLASMA POLISHING MACHINE

Before Polishing

After Polishing

Before Polishing

After Polishing

Easy to Use

Easy Operation

Safe&Environmentally friendly

AP07

01 Product Advantages

- **Single phase power supply :**
applicable to multiple scenarios
- **Corrosion resistant design :**
easy to clean
- **High quality :**
high polishing consistency
- **Can be equipped with exhaust gas treatment device**
- **Low Loss:**
precise control of removal amount, low workpiece loss and no edge distortion
- **More convenient and flexible:**
easy operation and flexible time setting

02 Technical Parameters

Item	AP07	Item	AP07
Polishing Tank Capacity	13L	Power Supply	1/N/PE AC220V 50Hz
Capacity	≤2 Pcs	Machine Size	600×560×1038mm
Max.Polishing Power	8.5KW	Weight	200kg
Heating Power	3KW	Applicable Material	CoCr,Titanium Alloy
Work Time	≤10min		

*All the description and specification aforementioned are subject to Chamlion's final explanation

Special Powder For Plasma Polishing

Durable

More than 240 partials polish can be polished per kilogram

Safe

All materials are food grade raw materials

Wide Range of Applications

Compatible with all models of plasma polishing equipment on the market
